Objective

I have a clear, logic mind with a practical approach to problem solving and a drive to see things through to completion. I have a strong technical skills as well as excellent interpersonal skills, that enabling me to interact with others. I am eager to be challenged in order to grow and further improve my IT skills. My greatest passion in life is using my technical skills to benefit other people and organizations. I am however open to tackling new challenges and working with new technologies including new languages, tools and frameworks.

Experience

- Wethinkcode_** *August 2020 - November 2020*
 - Cohort assistance
 - Covid-19 control & prevention guide.
 - Assisting students with their projects.
- Wethinkcode_** *June 2020 - July 2020*
 - Bootcamp assistance
 - Doing daily stand ups.
 - Assisting with technical issues.
 - Assisting bootcampers with coding, linux commands, git, and also do workshops using Google meet for social distancing.
 - Covid-19 control & prevention guide
- Bbd** *February 2019 - May 2019*
 - Software developer (intern)
 - I was involved in fixing bugs and adding or removing features in an existing project.
 - At times I was required to do something different like creating or fixing a tool that is used by the team to make our work a bit easier.
- Freelance Web Developer** *Jan 2021 - Present*
 - As a freelance developer, I have been building websites and also offering maintenance services, in most cases I use HTML, CSS, Javascript, PHP and MySQL. My work includes integrating data from various back-end services and databases, gather and refine specifications and requirements based technical needs

Education

- Pc training & business college** *2011*
 - Information Technology
 - Higher Certificate
- Everest Leadership training** *2015 - 2016*
 - System support
 - National Certificate
- Wethinkcode_** *2018 - 2020*
 - Software engineering
 - NQF LEVEL 5

Projects

Personal Details

Github : <http://github.com/MatthewThabo>

Camagru

- ☐ Web project - instagram clone image sharing site created using php, html, javascript, MySQL.

Matcha

- ☐ Web project - dating site using php, MySQL database and web micro-frameworks

Hypertube

- ☐ Web project - Streaming video site using mvc framework and bittorrent protocol.

Avaj launcher

- ☐ Java project itself is to design a simulation for different types of aircraft and their interaction with the weather.
- ☐ A uml diagram is provided with all the minimum classes attributes needed to be implemented.
- ☐ Coordinates are positive numbers.
- ☐ The height is in the 0 - 100 range.
- ☐ Each time an aircraft is created, it receives a unique ID, there can't be two aircrafts with the same ID.
- ☐ When a weather changes occurs, each aircraft type needs to log a message.
- ☐ Each time an aircraft registers or unregister to or from the weather tower, message will be logged.

Swingy

- ☐ Java project.
- ☐ Text based RPG follows the Model-view-Controller architecture and allow switching between the console view and GUI view.
- ☐ A player can have a multiple heroes of different types, after choosing a hero the actual game begins.
- ☐ The initial position of the hero is in the center of the map. You win the game if you reaches on the borders of the map.

Fix me

- ☐ Java project.
- ☐ This project implement simulation tools for the financial markets that exchange a simplified version of fix messages.
- ☐ The tools are able to communicate over network using TCP protocol.

Docker

- ☐ Docker project.
- ☐ Docker is a 42 project in the system and network administration branch, the project objective is to learn how to use containers to deploy your code in different operating system or with different configurations.

Achievements & Awards

- IBM Introduction to programming using HTML,CSS badge
- IBM Web development badge
